

## Calculator API message codes

Code	System Message	Trigger Condition	Client Display Message
100	Service not covered	<code>isServiceCovered = N</code>	"This service is not covered under your plan."
101	Provider is Out of Network	<code>provider array is empty</code>	"The provider is OON"
300	Service Amount Returned	<code>ServiceAmount &lt; OOPMAXRemaining</code> <code>ServiceAmount &lt; mcs</code>	"Its cheaper to pay the service amount vs go the insurance route"
600	Benefit limit reached (quantity)	<code>limitType = Quantity</code> and <code>limitCalculatedValue = 0</code>	"You've reached the allowed number of visits for this service."
601	Benefit limit reached (dollar)	<code>limitType = Dollar</code> and <code>limitCalculatedValue = 0</code>	"You've reached the dollar limit for this benefit."
602	Partial benefit coverage (dollar)	<code>limitType = Dollar</code> and <code>ServiceAmount</code>	"Your plan covers part of this service. You may owe the remaining amount."

		<code>&gt;</code> <code>limitCalculatedValue</code>	
700	OOPMAX met (individual)	<code>OOPMAXIcalculatedValue = 0</code>	"You've reached your individual out-of-pocket maximum."
701	OOPMAX met (family)	<code>OOPMAXFcalculatedValue = 0</code>	"Your family has reached the out-of-pocket maximum."
702	OOPMAX not met	<code>OOPMAXIcalculatedValue &gt; 0</code> and/or <code>OOPMAXFcalculatedValue &gt; 0</code>	"You haven't reached your out-of-pocket maximum yet."
800	Copay applies after OOPMAX	<code>copayContinueWhenOutOfPocketMaxMetIndicator = Y</code>	"A copay still applies even after reaching your out-of-pocket max."
801	Copay does not apply after OOPMAX	<code>copayContinueWhenOutOfPocketMaxMetIndicator = N</code>	"No copay applies after reaching your out-of-pocket max."
802	Copay applied	<code>costShareCopoly &gt; 0</code>	"A copay applies to this service."
803	Copay waived due to service amount	<code>costShareCopoly &gt; ServiceAmount</code>	"Your copay is more than the service cost. You'll only pay the service amount."
900	Deductible applies before copay	<code>isDeductibleBeforeCopay =</code>	"Your deductible applies before any

		Y	copay.”
901	Copay applies before deductible	isDeductibleBeforeCopay = N	“Your copay applies before your deductible.”
902	Deductible met	DeductibleValue = 0	“You’ve met your deductible.”
903	Deductible not met	DeductibleValue > 0	“You haven’t met your deductible yet.”
1000	Coinsurance applies	costShareCoinsurance > 0	“You’ll pay a percentage of the remaining cost as coinsurance.”
1001	Coinsurance does not apply (OON)	coinsAppliesOutOfPocket = N	“This service is out-of-network. Coinsurance does not apply.”
1002	Coinsurance capped by OOPMAX	CoinsuranceAmount > OOPMAXRemaining	“Your coinsurance is limited by your out-of-pocket max.”
